COVID-19 (also called Coronavirus) is a new virus that spreads from person to person.

• It can cause mild illness, like a cold.
• It can cause severe illness, like pneumonia.
• People with health conditions, over age 60 or who are pregnant are most at risk.
• Currently, no treatment or vaccine is available.

How does it spread?

• Coughing or sneezing
• Close contact with a sick person
• Touching a surface with the virus on it

Symptoms

Cough  Fever  Shortness of Breath

What if I feel sick?

If you feel sick, see a health care provider and get tested.

Contact a health care clinic or local urgent care. Tell them all of the symptoms you have.

Do you have severe symptoms?

• Difficulty breathing
• Pain or pressure in your chest
• High fever

Call 911 and tell them all of the symptoms you have.
