

# DOUGLAS COUNTY COVID-19 RESPONSE TEAM

Our local COVID-19 updates represent the coordinated effort of the agencies that make up the DCCRT

## JOINT INFORMATION CENTER PRESS RELEASE - FOR IMMEDIATE RELEASE – October 21, 2020 DOUGLAS COUNTY COVID-19 RESPONSE TEAM - DAILY UPDATE

(Douglas County, Ore.) Douglas County COVID-19 Test Results: The Douglas County COVID-19 Response Team remains committed to our local COVID-19 response. **As of 12:00 pm today, Wednesday, October 21, 2020, there are FOUR people with new positive test results and ONE new presumptive since our noon case update yesterday.** The total number of cases (people with positive test results and presumptive) in Douglas County is now at 333\*. Currently, there are FIVE COVID-19 patients that are being hospitalized. One Douglas County patient is being hospitalized out of the area, three Douglas County patients are being hospitalized locally, and the fifth patient is being hospitalized locally, but they are not a resident of Douglas County and are not reflected in our case numbers, but we wanted to note that they are being hospitalized locally at this time.

### Douglas County, OR - COVID-19 - Case Update

Date	Saturday, October 17, 2020	Sunday, October 18, 2020	Monday, October 19, 2020	Tuesday, October 20, 2020	Today, Wednesday, October 21, 2020
<b>Total COVID-19 Cases</b>	315	316	319	328	<b>333</b>
<b>People with Positive PCR or Antigen Test Results</b>	282	282	285	294	<b>298</b>
<b>Presumptive</b>	33	34	34	34	<b>35</b>
<b>Total Currently Hospitalized</b>	5	4	6	5	<b>5</b>
<b>Total Currently in Isolation</b>	46	44	49	43	<b>45</b>
<b>Total COVID-19 Related Deaths</b>	4	4	4	4	<b>4</b>
<b>Total Negative Test Results</b>	14,653	14,692	14,752	14,843	<b>14,930</b>

\*Our daily update includes the total number of cases in Douglas County, which combines people with positive test results and presumptives. We provide a breakout of the people with positive test results and presumptives in the chart above. Please note there will be times when a presumptive will move to a positive test result, and our total case number will not change because the case has already been counted, instead you will see an adjustment to our breakout numbers for positive test results and presumptives.

#### A Look at the Current Status of COVID-19 Around the World with Dr. Bob

(Adapted from Dr. Bob's Tuesday, October 20, 2020 Facebook Live Event featured on DPHN's Facebook page)

Worldwide, COVID-19 is still an incredibly active pandemic with 40 million cases, 1.1 million deaths and over the weekend there were 400,000 cases reported in one day. Until September 4<sup>th</sup>, we never had a day with over 300,000 cases in the world, now almost every day is 300,000+ cases. As much as we hope or think we can keep the pandemic contained to Douglas County, we can't, because as you know there will continue to be travel and commerce. So, until this disease is tamped down in the whole world, it's going to continue to be a threat. Throughout the world, India, the United States, Brazil (kind of all of South America) and then Europe are really seeing lots and lots of disease and France, actually had a higher case rate, per hundred thousand, than did the United States. The death rate in those areas is still pretty low, but still it's worrisome. COVID is remarkably still quiet in New Zealand, Australia, South Korea and Taiwan. When he looked at numbers over the weekend in those areas, Australia who has a population of 25 million people, had eight cases; China with one and a half billion people reported 13 cases; South Korea with 50 million people, had 91 cases and Taiwan reported no cases. So, as much as we think there's nothing we can do here in the US to halt the spread of the virus, there really is something we can do, we can take a look at these other countries success rates. I've had a chance to visit China, South Korea and Taiwan many years ago, and here in the United States, we really do have a number of modern advantages over

these countries. So, it's not undoable to get a handle on our case counts. He did go on to say that there are some diseases that are impossible to control, like measles. But, this does seem to be one that we could control with enough effort. The US reported 8.4 million cases and 225,000 deaths today. The pandemic is still very active in Illinois, Tennessee, Texas, Florida, North Carolina, California and Wisconsin. He stated that 23 states, have been reporting over a 1,000 cases a day. In Oregon we will probably hit 40,000 cases this week and we are at 620 deaths. We are clearly in a third wave. So, when you look at our positive case graph, and look at the dates of the cases; we had clearly a first short peak in March-April; a second peak over the summertime and now a very definitive peak since mid-September that's going up. I think we are about the same as the rest of the country in seeing that third peak of cases. This is a worry, as you remember a month ago I was worried about Israel, who has been about month ahead of us, a really sharp peak at the beginning of September. My concern is that we would also have a peak in the middle of October, and it seems to be coming true. In Douglas County we had 10 cases today (Tuesday, October 20, 2020), and those ten cases come from all over. The cases come from multiple outbreaks including a long term care facility, a school and multiple other businesses. Thus, we are really starting to see a number of cases from all over the county, and it has been a challenge to track them down. For instance, one of the outbreaks was traced back to an indoor gathering of 30 people, with guests from around the county, as well as from Utah, who is having an enormous outbreak. You bring people in from another state, you have a big gathering for a few hours, so it is not a shock that we have cases and it becomes a super spreader event. But, then as people get sick, it starts to move from families to businesses to schools to childcare to the hospital. When this happens it makes it so, so hard to control. If we are going to get this pandemic under control in Douglas County, we really, really need to reconsider travel and really, really, really need to reconsider social gatherings. **Please Join Us In Helping To Prevent The Spread Of COVID-19 In Douglas County**

Another day with a big increase in cases. We know we keep reiterating this message, but our primary focus is to do everything we can to protect the health, safety and wellbeing of our citizens. Today, as noted above, we reported a significant spike in new cases. With the onset of cold/flu season, holiday happenings on the horizon, some schools people yearning for social activities and parents already expressing remote teaching fatigue, it's important that everyone get back on track with COVID-19 prevention measures. It is definitely not the time to forgo your preventative COVID-19 health and safety measures. If you still want to partake in social activities, we ask that you do so with safety and COVID protection in mind. The DCCRT team continues to encourage residents to protect themselves, their loved ones and their communities by practicing prevention measures to stop the spread of the coronavirus.

**Residents can help to protect themselves, their families and our communities from the spread of COVID-19 by following these simple, basic health and safety precautions:**

- **Make a habit of washing and sanitizing your hands. That means washing after you eat, touch new surfaces, go to the bathroom, go to the store, go to the post office or after a meeting. Remember also to try to avoid touching your face as much as possible.**
- **Stay at least six feet apart from anyone that is not from your immediate household. This means paying attention to the distance stickers at the store, the bank, at restaurants and at businesses. Please be respectful and polite, by giving people ample space.**
- **Stay home from work, school and play if you are sick. This includes not running errands or going shopping or inviting visitors to your home. If you need help, reach out to friends, family or utilize an app or businesses that offers no contact deliveries.**
- **Minimize travel, especially out of the state and limit visitors to your home.**
- **Wear a mask were recommended.**

Our recent cases can be attributed to travel and unwitting and unintentional behavior by residents choosing to attend or host social gatherings where COVID-19 guidelines for social distancing, food preparation, hand washing and masks are not being followed. Cases have been linked to social gatherings including: birthday parties, weddings, funerals, prayer groups, play dates, visiting family members and school events. Again, we ask that you take a moment and revisit how you are socializing and please protect yourself and your loved ones from the spread of this virus. Please stay safe and remember to be kind to others. Stopping the increase of COVID-19 cases in our county is really up to YOU, our citizens.

**UPDATED: OHA Definition for Recovered**

We wanted to let you know that as per the Oregon Health Authority COVID-19 Investigative Guidelines, the number of recovered is no longer being assessed or reported. Up until May 1st, 2020 recovery from COVID-19 was defined as being afebrile (not feverish), without the use of antipyretics (medicine to reduce a fever), and having resolution of cough, shortness of breath and diarrhea for at least 72 hours. As more was learned about symptoms, recovery and contagious period, the definition of recovered changed. Beginning May 1st, OHA stopped reporting recovered cases while also separating

**What Can YOU Do to Prevent The Spread of COVID-19**

- Stay home** if you're sick
- Wash your hands often**
- Stay 6 feet away** from people when in public
- Talk to public health** if you think you've been exposed to a known positive case
- Know risks of gatherings** — indoor, larger, close contact all higher risk
- Know your own personal risk**, some people are more high risk
- Wear mouth and nose coverings**, to protect others and yourself
- Limit travel**

**DOUGLAS PUBLIC HEALTH NETWORK** COVID-19 Hotline (541) 464-6550 8 am-5 pm, 7 days per week  
 Visit [douglaspublichealthnetwork.org](http://douglaspublichealthnetwork.org) for the latest updates on testing and FAQ

recovery from contagious or isolation period. Many cases were no longer contagious as they were outside of the contagious period, but still having lingering symptoms. To be consistent with OHA and to adapt as we learn more about this new virus, we removed the column in our chart listing recovered cases. At that point, we added the number of those in isolation, roughly indicating active or infectious cases of COVID-19.

**Currently, DPHN is supporting 45 cases in isolation, as well as another 109 contacts in quarantine in Douglas County. Isolation is recommended for confirmed and presumptive cases, quarantine is recommended for contacts of confirmed or presumptive cases. This number represents a snapshot of the significant amount of work being done by our county and our public health to help control the spread of COVID-19.**

### **Getting Tested & Testing Clinics**

**The next drive-through testing clinic will be Friday, October 23, 2020, in Roseburg.** As a reminder, if you are having symptoms of COVID-19 including cough, fever, shortness of breath, muscle aches and pains, diarrhea, sore throat or decreased sense of smell and taste, talk to your health care provider about being tested for COVID-19. Patients without a Primary Care Provider, that are looking for a COVID-19 test should contact the Sutherlin Aviva Health Clinic at (541) 459-3788. The first drive-through testing site was piloted in the county on March 17, 2020, there have been 1682 people tested in 83 drive-through clinics, while additional testing continues in hospitals, urgent cares and clinics. The drive-through clinics are led by DPHN, in conjunction with partner agencies including; Douglas County COVID-19 Response Team, Douglas County Board of Commissioners, Douglas County Sheriff's Office, Douglas County Public Works, local volunteers and local health professionals.

### **Oregon COVID-19 Case Update**

Oregon Health Authority (OHA) reports new cases once a day on their website at [www.healthoregon.org/coronavirus](http://www.healthoregon.org/coronavirus). OHA also releases a daily situation status report and a weekly report that details the overall picture of the COVID-19 outbreak within our state. The daily report details positive and presumptive cases, as well as deaths by county and statewide, while the weekly report is more in depth and includes statistical data related the severity of cases by age, gender, zip codes, ethnicity, as well as information on workplace and senior care facility outbreaks in Oregon. Find additional information on the state or Federal COVID-19 response go to [Oregon Health Authority](#), [Centers for Disease Control](#), and [211Info](#).

### **Oregon COVID-19 Presumptive**

OHA expanded their reporting for COVID-19 case management to now include presumptive COVID-19 cases in their total case number. DPHN is reporting the number of people with new positive test results and any new presumptives and uses the OHA's definition of presumptive as having had close contact with a known, confirmed COVID-19 case, showing symptoms and not yet having a positive nasal swab/PCR or antigen test for COVID-19. Testing continues, as DPHN has been holding 2-3 clinics a week and hospitals, urgent cares and clinics continue to test. DPHN continues their epidemiologic investigations, identifying individuals who may have had close contact with individuals that have tested positive for COVID-19, advising and supporting quarantine and isolation.

### **COVID-19 Travel Caution: Please Limit Travel, Social Gatherings and Visitors**

We will continue to encourage residents to be cautious about traveling or inviting people from outside our county, and instead encourage our residents to delay travel, consider stay-cations and reschedule visits from out-of-the-area friends and family to a later date. We continue to identify people with positive test results that have chosen to travel out of Oregon to visit relatives or to take vacations. While traveling those individuals and families have come in contact with someone with COVID-19 and brought it back to Douglas County. We have expanded our list of states directly related to our cases though travel, they include Alaska, Washington, California, Idaho, Nevada, Arizona, Texas, Louisiana, Florida, Tennessee, Michigan, Ohio, Massachusetts and Wyoming. A few other cases were the result of a family member coming to Douglas County to visit, brought the virus with them and infected their host family.

### **Facebook Live with Dr. Bob Dannenhoffer**

Join us **Friday, October 23, 2020** for the next virtual town hall Q&A with Dr. Bob Dannenhoffer, your Douglas County Public Health Officer at 6:00 pm, hosted by DPHN and found on the [DPHN Facebook page](#). In the meantime, check out Dr. Bob's latest video with his creative 'Trick-or-Treat' candy delivery system. As always, please remember be safe and be kind. <https://www.facebook.com/DouglasPublicHealthNetwork/videos/661129401468910/>

### **Douglas High School Announces Positive Case**

Shared from the [Winston-Dillard School District Facebook Page](#). In a notice posted to their Facebook page at 5:53 pm on Tuesday, October 20, 2020, school officials with the Winston-Dillard School District announced that they were notified by DPHN and Dr. Dannenhoffer, our Douglas County Public Health Officer, that a student at Douglas High School has tested positive for COVID-19. W-D School officials have been very proactive in their approach in dealing with this event to help mitigate the spread of the virus. Below is a copy of the notice that was posted yesterday:

*Dear Students, Families, and Staff,*

*We were notified by Douglas Public Health Network and Dr. Bob Dannenhoffer, our Douglas County Public Health Officer, that we have had one student test positive for COVID-19 at Douglas High School. We are working very closely with local public health and The Oregon Health Authority to notify parents of the children in the cohort that the child that tested positive was in and are asking them to quarantine for 14 days and monitor for symptoms.*

*"Although this is a third school outbreak that we've seen locally, it is another example of a school utilizing student cohorts to reduce risk and mitigate transmission of COVID-19 in a school setting. School officials are working very closely with DPHN and myself to care for the one positive case and advise parents, families and staff that are close contacts. We believe the risk is low to the school community and DPHN remains available to support the families that are quarantining." Dr. Bob Dannenhoffer, Douglas County Public Health Officer.*

*If your child was in the same cohort, or a staff member in the same cohort, and needs to quarantine, you will be notified by school officials this evening. If you have concerns or questions about COVID-19, please call the Douglas Public Health Network hotline at 541-464-6550, 7 days a week between 8-5:00 pm.*

*Sincerely,  
Kevin Miller, Superintendent  
Craig Anderson, DHS Principal  
Robert Holveck, DHS Assistant Principal*

For reference: The Oregon Health Authority issues a weekly COVID-19 report that publishes data on schools with in-person instruction, child/day care centers, businesses and care facilities that meet their outbreak criteria. The cut off for that report is Sunday each week, so this event will not be listed until their Wednesday, October 28, 2020 report. As of last week, OHA's policy related to school outbreaks is to report outbreaks with 1 or more cases in school settings at any place of learning for students from kindergarten through twelfth grade, or a subset, with at least 30 students enrolled. Case counts include all persons linked to the outbreak (epilinks), which may include household members or other close contacts of cases, and not just employees, staff or students at the school. According to OHA, the notice is to inform the public of potential COVID-19 exposure and to provide transparency surrounding COVID-19 in schools. School is defined as any place of learning for students from kindergarten through twelfth grade, or a subset, with at least 30 students enrolled. This includes, but is not limited to, public schools, private schools, parochial and charter schools. Staff is defined as any person who works full time or part-time at the school, regardless of their position. A volunteer is defined as any person who volunteers onsite. OHA attributes cases through use of what, they define as an epidemiological link or an epilink. An epilink is a place or person or a group who've tested positive for COVID-19 have in common, such as a school, workplace, facility or family member. When OHA declares a school or care facility outbreak, which it does on a weekly basis, it does not mean that the location was the source of the outbreak, only that the worksite is the shared "epilink."

**REMINDER: Aviva Health: North Douglas County Free Flu Shot Clinics**

Shared from [Aviva Health](#). Flu season is upon us and the Aviva Health's North County Clinic will be hosting free, no appointment necessary flu shot clinics on Friday, October 23, 2020, from 1:00 pm to 4:00 pm and again on Saturday, October 24, 2020 from 10:00 am to 1:00 pm. The Aviva Health North County Clinic is located at 316 West A Avenue in Drain. Click here for the event flyer. For more information about the free flu shot clinics contact Aviva Health at (541) 672-9596, or by email at [info@aviva.health](mailto:info@aviva.health) or by logging onto their website at [www.aviva.health](http://www.aviva.health) or their social media at [www.facebook.com/avivahealthor](https://www.facebook.com/avivahealthor)

**REMINDER: Drive-Thru Flu Clinic October 30 from 10:00 am to 2:00 pm**

Douglas Public Health Network, partnering with emergency management and medical personnel from around Douglas County, will be conducting a second drive-thru point of dispensing (POD) emergency preparedness exercise to practice rapid dispensing of medications during a public health emergency on Friday, October 30, 2020 from 10:00 am to 2:00 pm at the Douglas County Fairgrounds. The first exercise was on October 16, 2020. The exercise will include dispensing free flu vaccines to community members 6 months and older to the first 300 participants each day. If a widespread disease or other emergency were to occur, it may be necessary for the local health department to activate PODs to dispense large amounts of vaccinations, antibiotics or other medicines to the community. This POD exercise is a great opportunity or community members to get vaccinated against the flu and be involved in emergency preparedness planning in Douglas County. POD participants will receive a free flu vaccination administered by area health professionals. They will remain socially distanced in their vehicle throughout the exercise. During the event, participants will be directed through the exercise with local officials and community volunteers. They will be asked to complete a brief intake form, receive medical screening if indicated, proceed to a vaccination station for a free flu vaccine and then exit the exercise. The intake form may be completed and printed prior to arrival by using the Dispense Assist website at <https://www.dispenseassist.net/flu.html>. These exercises help our community prepare for public health emergencies and are in partnership with several local and state agencies including Douglas County Board of Commissioners, Douglas County Sheriff's Office, Cow Creek Band of Umpqua Tribe of Indians, Oregon Health Authority, Aviva Health, Mercy Medical Center, Umpqua Community College and Red Cross.

**REMINDER: Aviva Health Offering Veterans Free Flu Shots at 2020 Veterans' Day Parade**

Shared from [Aviva Health](#). Aviva Health is providing area veterans free flu shots at this year's Douglas County Veterans' Day Parade Wednesday, November 11, at 11:00 am. Organizers of this year's event are planning a reverse parade, where floats and other elements of the parade will remain stationary while visitors to the event drive by them in their cars. Proper social distancing and masking guidelines will be followed to protect people from COVID-19. Aviva Health typically hosts a Veterans' Day event at its Roseburg campus called Vets and Their Pets, but the pandemic forced the organization to cancel this year's festivities. Still, Aviva Health intends to honor and assist those who have served in a meaningful way.

**LOCAL COVID-19 INFORMATION**

**Stay Informed with Accurate Local Information**

Stay up to date on COVID-19 in Douglas County on the [Douglas County Government website](#) or the [DPHN website](#). Your Douglas

County Board of Commissioners, Douglas County Public Health Officer, Dr. Robert Dannenhoffer, DPHN and the Douglas County COVID-19 Response Team (DCCRT) have been working hard to cooperatively provide accurate and timely information to Douglas County residents since March 8, 2020. Our local COVID-19 updates represent the coordinated effort of the agencies that make up the DCCRT.

**Douglas County Resource/COVID-19 Hotline: (541) 464-6550:**

Douglas County Commissioners and Douglas Public Health Network have added a resource and referral service to the current COVID-19 hotline for Douglas County residents. The added service will help residents get connected to resources and services due to the local wildfires. Referral and resource information will be available about local emergency shelters, livestock and animal boarding options, donation locations, volunteer opportunities, welfare check referrals, food and water

resources and help with health and wellness questions. This is **NOT** the hotline for Fire Updates or Evacuation information. Please contact or follow DFPA and DCSO for the most up-to-date wildfire information. **The Resource/COVID-19 Hotline is (541) 464-6550. It is staffed from 8:00 am to 5:00 pm, 7 days a week until further notice.**

**Questions about Governor's Reopening or Statewide Rules?** If you have questions or need more information go to the Governor's COVID-19 website at <https://govstatus.egov.com/or-covid-19/> or call the Business Oregon's Navigator Hotline at (833) 604-0880. For information on COVID-19 in Oregon, call 211 or visit [211info](#)

**Who Do You Contact to Report Compliance Issues with the Governor's Statewide Rules? Please do not call 911, Douglas County Sheriff's Office or Douglas County Offices to report compliance issues with the Governor's orders.** The Governor has directed the State offices for Oregon Occupational Safety and Health (OSHA) and the Oregon Liquor Control Commission (OLCC) to be the enforcement agencies responsible for ensuring restaurants, bars, and other businesses comply with COVID-related rules. **For more information or to report compliance issues contact:**  
**OSHA:** (800) 922-2689 or [OSHA website](#) or **OLCC** (503) 872-5000 or [OLCC website](#)
